

TraceCo Company *Profile*

An aerial photograph of a winding asphalt road that curves through a dense, lush green forest. The road is light gray and contrasts with the dark green foliage. The perspective is from directly above, looking down at the road as it snakes through the trees.

WHO *WE ARE*

PT Lacak Lingkungan Cerdas, under the brand name TraceCo, is a forward-thinking platform dedicated to advancing sustainable practices through a suite of specialized services and products. Our offerings include comprehensive solutions for sustainability management, such as Sustainability compliances, GHG Accounting, Carbon Management, and advanced Mapping and Remote Sensing technologies. Designed to help businesses and agricultural sectors meet sustainability standards, our services optimize resource management and reduce environmental impact.

At TraceCo, we provide innovative tools like our Dashboard for monitoring sustainability metrics, our Emission platform for precise carbon footprint management, and our Mapping services that leverage the latest GIS technologies for landscape analysis and land-use planning. By prioritizing transparency and efficiency, we enhance the entire supply chain—from production to distribution—ensuring every step contributes to a more sustainable and traceable system. Our mission is to empower stakeholders across the supply chain to achieve their sustainability goals through technology and data-driven strategies, ultimately fostering environmentally responsible practices that benefit businesses, communities, and ecosystems.

Our *Values*

Transparency

Ensuring complete visibility into the supply chain, from raw material to end-product

Optimization Impact

Empowering businesses to make and create a positive impact on the planet and society through data-driven sustainability

Sustainability

Driving a shift towards environmentally responsible practices and reducing carbon footprints

Technology-Driven

Leading the change in sustainability technology, TraceCo will create a world where every product carries a story of positive impact

⁰¹ Environmental Studies

Due Diligence assessment toward EUDR regulations
Preparation, Capacity Building, Assistances on pursuing the sustainability certifications scheme, especially on RSPO P&C, RSPO ISH, Rainforest Alliance, Organic, and ISCC
Environmental Assessment
Carbon and Greenhouse Gas (GHG) Assessment

⁰² Sustainability Strategies

Sustainability Standards Preparation
Assistance for Sustainability Compliance
Sustainability Management and Monitoring Plan
Sustainability Risk Assessment
Greenhouse Gas Emission Management Plan

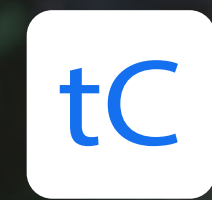

⁰³ Mapping and Remote Sensing

Land Use Change Analysis (LUCA)
Land User Risk Identification (LURI)
Remote Sensing and GIS Analysis
GIS Database and Web-GIS Development
Conservation Area Field Verification, Demarcation, and Mapping
Palm Inventory/Counting
